

Recurse Center

A Dossier

Structure. History. Programs. People. Money. Footprint --- 2011 to 2026

[working draft — not for citation]

Note. This is a dossier, not an argument. It assembles, in one place, what is publicly recoverable about the Recurse Center — the New York-based programming retreat founded in 2011 as Hacker School — across structure, periodized history, programs, people, finances, and cultural footprint. RC is a for-profit privately-held company; there are no IRS Form 990s. The data path is therefore the founders’ own essays, the recurring *User’s Manual*, the public hiring page, the Recurse blog, and a small set of journalist interviews. Where facts run out the dossier stops; gaps are flagged inline.

1. THE POSTURE

The Recurse Center is famous for a refusal: it is not a school. The *User’s Manual* opens by naming the genre it isn’t: “Unlike traditional schools, RC is self-directed — there are no teachers, no grades, no exams, and no curriculum.” [Recurse Center, 2011–2026] The pedagogy traces explicitly to John Holt’s unschooling lineage [Wikipedia contributors, 2026]; the four “social rules” — no feigning surprise, no well-actuallys, no back-seat driving, no subtle -isms — have circulated through programming communities for over a decade as a stand-alone export. The retreat is free to participants; the company that runs it makes its money downstream, by charging companies that hire alumni.

The dossier records the structure that lives inside that refusal. There is a legal entity. There is a business model. There are employees with titles. There is a board of directors. None of that is hidden, and none of it is a contradiction — but in a field where most peers (SFPC, Pioneer Works, Rhizome’s old MFA partnerships) are nonprofits, charities, or LLCs draped in nonprofit language, RC is the unembarrassed counterfactual: a privately-held for-

profit that rejects the school form on *pedagogical* grounds and the nonprofit form on *operational* grounds.

2. ORIGIN: FROM HACKRUITER TO HACKER SCHOOL TO RECURSE CENTER

2.1 Hackruiter (Summer 2010)

The organization began as a *recruiting* company. In Summer 2010, Nick Bergson-Shilcock and Sonali Sridhar received seed funding from Y Combinator for a startup called Hackruiter, an engineering recruiting firm. [Wikipedia contributors, 2026, Y Combinator, 2026] The Y Combinator connection is the founding capital event; subsequent rounds, if any, are not publicly disclosed in standard databases.

2.2 Hacker School (July 2011)

In July 2011, the founders pivoted Hackruiter into Hacker School — a free, three-month programming retreat in New York City. David Albert joined as a co-founder. The pivot retained the recruiting infrastructure: Hacker School would be free for participants and

would sustain itself by charging companies that hired its alumni. The name was a deliberate (and, in retrospect, costly) appropriation: “Hacker” in the original Stallman/MIT sense of skilled, playful programmer, not the security-breach sense. [Bergson-Shilcock, 2012]

2.3 Etsy and the Hacker Grants moment (2012)

Hacker School came to wide public attention in mid-2012 when it partnered with Etsy on the Hacker Grants program: ten \$5,000 living-expense grants for women to attend the Summer 2012 batch. [Griffiths, 2012] Etsy ultimately committed roughly \$50,000 of grants in that first cohort year and over \$200,000 in commitments by 2014; Dropbox, Tapad, Tumblr, Jane Street, and others followed. [Recurse Center, 2014] The community grew from under 5% women to roughly 35% over two and a half years; by 2019, 48% of new admits identified as women, trans, or non-binary. [Recurse Center, 2019]

2.4 Self-sufficiency from recruiting (2014)

Per Wikipedia, RC achieved self-sufficiency from recruiting income by 2014 [Wikipedia contributors, 2026] — meaning the recruiting fees from companies hiring alumni began to cover operations without continued reliance on the original Y Combinator seed or external grants. The grant program shifted in 2015 from corporate-sponsored grants (Etsy, Dropbox, etc.) to self-funded grants paid out of RC’s own operating budget. Leadership “chose to take 60% pay cuts” for four months rather than reduce grant funding. [Recurse Center, 2019]

2.5 The 2015 rename

On March 25, 2015, Nick Bergson-Shilcock published *Hacker School is now the Recurse Center* [Bergson-Shilcock, 2015]. The post named two pressures: “hacker” read as “computer criminal” and felt exclusionary; “school” was misread as a coding bootcamp. A specific operational pain point in the rationale: roughly 30% of participants crossing US borders had encountered immigration friction because of the name. [Hacker News, 2015] The team rejected “retreat” (too limiting) and “institute” (pretentious) and chose “Recurse Center” as a near-meaningless phrase preferred over baggage-laden alternatives. The domain `recurse.com` was available; “RC” became the everyday name. Bergson-Shilcock’s framing in the announcement: “While our name is changing, who we are and what we do is not.”

3. STRUCTURE

Legal entity Privately-held for-profit company, originally incorporated as Hacker School (the LLC/Inc. distinction in the corporate filings is not surfaced in current public material; Crunchbase and standard databases list “Recurse Center” / “Hacker School” as the entity, but a verified state-of-incorporation lookup is TBD). RC is

not a 501(c)(3); no Form 990 exists.

ProPublica No nonprofit entity for “Recurse Center” or “Hacker School” appears in ProPublica’s nonprofit database — consistent with for-profit incorporation.

Board of Directors David Albert, “Co-founder Emeritus,” worked full-time at RC until late March 2023 and “remains on the board of directors” [Recurse Center, 2026c]. The full composition of the board is not publicly disclosed. Whether the board is a fiduciary corporate board (typical of a for-profit C-corp) or an advisory body is not stated.

Self-description The *User’s Manual* is the load-bearing self-description: revised continuously since 2011, it is RC’s stand-in for a mission statement, syllabus, and code of conduct rolled into one [Recurse Center, 2011–2026].

4. THE ORGANIZATION, 2010–2026

4.1 Hackruiter → Hacker School (2010–2011)

Y Combinator-funded recruiting startup Hackruiter pivots into Hacker School in July 2011. First batches run in Manhattan. Founders: Bergson-Shilcock (CEO), Sridhar (Head of Recruiting), Albert (technical/program leadership).

4.2 The Hacker Grants years (2012–2014)

Etsy partnership; rapid diversity gains; community scale-up to “a few dozen → nearly 450” [Recurse Center, 2019]. Self-sufficiency from recruiting reached in 2014. [Wikipedia contributors, 2026] Notable alumni in this period include Timnit Gebru (Summer 2012), Michael Nielsen (Summer 2012), Greg Brockman (Summer 2015 — pre-OpenAI).

4.3 The rename and consolidation (2015–2019)

March 2015 rename. June 2017 first formal Code of Conduct. [Wikipedia contributors, 2026] *Code Words* community journal launches. Multiple program experiments: facilitators, residents, “Maintainers” initiative, research labs, variable batch lengths trialled in the 3–6 week range. Brooklyn space at 397 Bridge Street becomes the physical hub. Hiring partners expand to include Airtable, Notion, Hudson River Trading, Jane Street, OpenAI [Wikipedia contributors, 2026].

4.4 COVID rupture and RC Together (2020–2022)

On March 12, 2020, Bergson-Shilcock announced via the blog: “We have made the difficult decision to temporarily close our space. Starting Monday, our operations will be fully remote.” [Bergson-Shilcock, 2020] The physical space closed Saturday March 14 at 5pm. RC pivoted to a fully online format using a custom-built tool, *Virtual RC / RC Together* — a 2D map representation of the physical space with Zoom-room integration [Recurse Center, 2020–2026]. In late 2020, RC announced that batches would continue running online

through 2021 [Recurse Center, 2020]. The online format became permanent: even after the physical reopening, online attendance is a first-class option, not a fallback.

4.5 Reopening and the hybrid era (2023–2026)

In May 2023, Rachel Petacat (Head of Retreat) announced *A new kind of retreat* — the reopening of the Brooklyn space and the formalization of a hybrid model where every batch supports in-person, online, and mixed participation [Petacat, 2023]. In late March 2023, David Albert transitioned from full-time staff to Co-founder Emeritus and board member [Recurse Center, 2026c]. In July 2025, Bergson-Shilcock published *Developing our position on AI*, a major organizational statement on how RC handles AI-assisted programming inside a self-directed retreat [Bergson-Shilcock, 2025]. Latka’s company database lists 72 employees and \$11.1M revenue (date and methodology unverified, treat with caution). [Latka, 2024]

5. PEOPLE

Tenure	Role	Name
2010–	Co-founder, CEO	Bergson-Shilcock
2010–	Co-founder, Head of Recruiting	Sridhar
2011–2023	Co-founder, full-time	Albert
2023–	Co-founder Emeritus, Board	Albert
?–	Head of Retreat	Petacat
?–	Senior Facilitator	Bernier (RC alum, W2 2024)
?–	Senior Facilitator	Lefevre
?–	Career Facilitator	Tolderlund
?–	Office & Operations Assistant	Khoury

Source: recurse.com/team (accessed 2026-05-02). Tenure dates for staff below the founder line are not surfaced on the team page.

The team page lists eight people total [Recurse Center, 2026c]; the org’s actual headcount is much larger (Latka lists 72; this is unverified). The visible roles cluster into three functions: *retreat operations* (Petacat, the two senior facilitators), *recruiting/career services* (Sridhar, Tolderlund), and *office* (Khoury). The CEO line (Bergson-Shilcock) and the emeritus board seat (Albert) round out the public-facing structure.

Notable alumni in the public record include Timnit Gebru (Summer 2012, AI ethics), Michael Nielsen (Summer 2012, quantum/deep learning), Greg Brockman (Summer 2015, OpenAI co-founder), Paul Biggar (Fall 2016, CircleCI co-founder), Raph Levien (Fall 2017, Advogato/Spiral), and Andrew Kelley (Zig language) [Wikipedia contributors, 2026]. The community scale is reported as 3,000+ alumni worldwide [Recurse Center, 2026a].

6. PROGRAMS

The core program is the **12-week full batch**, with a **6-week half-batch** option that can be extended to 12 weeks during the batch. Batches start every six weeks year-round. “Core hours” are Monday–Friday, 11am–5pm Eastern. Participation requires full-time commitment and work on open-source code only — proprietary work is excluded. [Recurse Center, 2011–2026]

Mini-batches (one-week, occasionally weekend-long) have been used as on-ramps for prospective Recusers and for alumni reunions; they are intermittent rather than scheduled.

RC Together / Virtual RC (2020–present) is the persistent online layer: a custom 2D-map tool that mirrors the physical space and integrates with Zoom, allowing remote participants to “walk into” rooms with the in-person crowd [Recurse Center, 2020–2026]. After the May 2023 reopening, every batch supports three modes: in-person at 397 Bridge Street, fully online, or hybrid [Petacat, 2023].

The three self-directives, formalized in 2023 [Schwartz, 2023], are RC’s stated pedagogical core:

- Work at the edge of your abilities.
- Build your volitional muscles.
- Learn generously.

The four social rules are RC’s most-cited cultural export [Recurse Center, 2011–2026]:

- No feigning surprise (at others’ knowledge gaps).
- No well-actuallys (pedantic interruptions).
- No back-seat driving (uninvited advice over someone’s shoulder).
- No subtle -isms (sexism, racism, homophobia, transphobia, ableism, classism).

7. MONEY

Because RC is privately held, there are no Forms 990 and no public P&L. The financial record is reconstructed from disclosed model details and journalist interviews.

7.1 The recruiting model

Standard fee: 25% of a hired Recuser’s first-year salary, excluding bonuses, due the day they start. [Recurse Center, 2026b] **Discounts:** registered 501(c)(3) nonprofits pay 20%; internships are free, but conversion to full-time at any later date triggers the standard 25% fee. **Guarantee:** full refund if the placement does not last 90 days. RC’s manual reports “nearly \$12,000” in internal cost *per participant* [Wikipedia contributors, 2026].

Metric	
Year self-sufficient	
Recurser per-head cost	
Standard recruiting fee	25% first-year salary
Nonprofit fee	
Hiring partners (current)	
Total grants disbursed (by 2019)	
Hiring partners (career grants by 2014)	~\$200,000 Etsy + \$100K Juniper
Alumni community	3,000+
Latka revenue figure (unverified)	\$11.1M

7.2 Disclosed scale signals

7.3 Hiring partners

The named hiring partners across RC’s public materials include Stripe, Etsy, Dropbox, Tumblr, Jane Street, Tapad, Hudson River Trading, Airtable, Notion, OpenAI, Juniper, Perka, plus current site-listed partners Dealops, J2 Health, Seabound, and Relevant. [Wikipedia contributors, 2026, Recurse Center, 2026b, 2014] The full roster is over 100 companies but is not surfaced as a single public list; the page rotates testimonials.

7.4 What is not disclosed

Annual revenue (the Latka figure is third-party and unverified), profitability, owner equity splits, board composition, the Y Combinator class/year/check size, any subsequent funding rounds, current cash position, employee count (other than the 8-person team page and an unverified Latka 72), and per-batch enrollment counts.

8. FOOTPRINT

RC’s footprint is a community of practice. Unlike Rhizome (which footprinted via Commissions and the Net Art Anthology) or SFPC (which footprints via fluent practitioner-teachers), RC’s exports are: (1) the four social rules, which have been adopted as conduct frameworks by other tech communities; (2) the unschooling-influenced retreat format, which has been imitated and remixed (e.g. Strange Loop satellites, the Bradfield School/Computer Science Intensive that some Recusers founded); (3) the alumni network itself, which forms a labor-market layer underneath several mid-sized NYC and remote tech employers; and (4) *Code Words*, the (now-quiet) community journal.

9. READING LIST

9.1 Primary sources (must-read)

- **The User’s Manual** [Recurse Center, 2011–2026]: load-bearing self-description; revised continuously.
- **Hacker School is now the Recurse Center** [Bergson-Shilcock, 2015]: the 2015 rename announcement.
- **What we mean when we say “hacker”** [Bergson-

Shilcock, 2012]: 2012 rationale for the original name.

- **What we’ve learned from seven years... 50% women, trans, and non-binary** [Recurse Center, 2019]: the most quantitative diversity-and-grants accounting in the public record.
- **A new kind of retreat** [Petacat, 2023]: the May 2023 reopening / hybrid-format announcement.
- **Developing our position on AI** [Bergson-Shilcock, 2025]: the July 2025 organizational AI stance.
- **Hire page** [Recurse Center, 2026b]: full pricing, the 90-day guarantee, the nonprofit discount.

9.2 Secondary

- Wikipedia entry [Wikipedia contributors, 2026] for the Hackruter origin, the 2017 Code of Conduct, and notable-alumni list.
- Hacker News thread on the rename [Hacker News, 2015] for the 30% border-friction stat and Bergson-Shilcock’s contemporaneous comments.
- Forbes coverage of the Etsy partnership [Griffiths, 2012].
- Y Combinator company page [Y Combinator, 2026].

10. WHAT THIS DOSSIER IS NOT

- Not a thesis. There is no question being answered.
- Not a critique. The for-profit / recruiting-funded model is surfaced, not judged. Pedagogical claims are quoted and attributed, not evaluated.
- Not a comparison. SFPC, Rhizome, ITP, Bradfield, and other adjacent organizations are mentioned only where they directly intersect RC’s public record.
- Not a memoir. The author has no documented relationship to RC.
- Not exhaustive. Gaps — the legal-entity form (Inc. vs LLC), board composition, annual revenue, profitability, employee count, current full hiring-partner roster, per-batch enrollment, alumni outcomes data — are flagged inline.
